

TaHoma® DIN-Rail

IN BRIEF

TaHoma® DIN-Rail is a box dedicated to new housing, individual or collective, which is built directly into the switchboard. It is an ideal solution for professionals, thanks to ease of installation and familiarisation. It is also ideal for various occupant change procedures.

ADVANTAGES

1. Built into the frame

Designed to perfectly follow the building's construction cycle, TaHoma DIN-Rail is built directly into the switchboard. Hence you limit the risk of breakage or theft during the work. With a width of just 7 DIN units, it will take up a minimum of space, for a discreet presence. The quick-release connections fitted will reduce the installation times.

2. TaHoma, the home control app, for use either in-situ or remotely.

TaHoma® is the app that will make your life easier, and simplify your customers' day-to-day lives.

This application will enable your customers to control their home equipment either in-situ or remotely. There are multiple possibilities, checking the equipment status, programming scenarios, and also advanced scenarios, thanks to Somfy range sensors.

3. An open and scalable solution

TaHoma DIN-Rail is compatible with Somfy products, partner products and voice assistants. Your customer can add new products over time with the TaHoma app®.

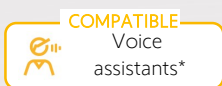

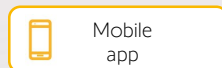

Created for and with users, for a completely new experience.
Accessible for all, simple & intuitive, hints available at any time.

- Shutters & blinds
- Lighting & sockets
- Gates, garage doors
- Terrace, awning

- Camera & alarms
- Heating, thermostat
- Music
